Student experiences

“The experience to work with different cultures and expertise is a really valuable one! You learn a lot about other people and yourself whilst trying to figure things out together.

The most important thing I learned during the project was how to work together with a completely new team and how important the emotional experience is for us when it comes to basically anything.”

Louise, International Business/NHL Stenden

“During the week I experienced so many feelings of succeeding! Especially those days when we carried out the business project in practice were extremely interesting. My team’s students were studying in 3 different time zones in India, Portugal and Finland.

And no reason to understate that feeling when my team’s solution to the business partner’s challenge was selected as a winner of the whole programme! It was amazing! I also hope that one day I can work again with the same team for another project, because together we can achieve so much!”

Johanna, Equine Business Management /HAMK

“The progress I made together with my subgroup of students was mind blowing. Who would’ve thought that I, as a nursing student, would develop and create a prototype smartphone app?! It felt good to broaden my horizon and explore skills I never knew I had.

The best thing in participating to this RUN-EU experience was to meet so many like-minded students. We were all from different disciplines and different countries, but all of us were so open-minded, motivated, dedicated and internationally oriented.”

Elaine, Nursing/NHL Stenden
Student Engagement

Students have affected the planning and development of RUN right from the beginning.

Launch event in Brussels in February 2020

Student Advisory Boards

- Advises the work of RUN-EU: Management Committee and innovating the work of RUN-EU (mobility innovation, SAPS, European degrees)
