

Mikkola Farm

Mikkola Farm in Finland is a nature-led, visitor-friendly landscape built around agroforestry, honeybees, and thriving forest-meadow edges.

By improving ecotones and integrating forest and pasture without livestock, the farm supports pollinators, biodiversity, and calm visitor experiences—inviting people to walk, learn, and reconnect with nature.

Three Goals of the Farm

Environmental

We restore nature.

Social

We bring people together.

Economic

We create lasting value.

Agroforestry

Agroforestry plan for this farm combines trees and food crops to work with nature. It restores soil, supports wildlife, and builds a resilient, productive farm—today and for the future.

Forest Areas

Tree-rich zones that support biodiversity and calm experiences.

Meadow Spaces

Open, flowering areas for pollinators and seasonal beauty.

Ecotone Zones

Blended forest-meadow edges where nature thrives most.

Visitor Paths

Gentle routes guiding people through the landscapes.

Small Steps, Big Impact

Restore Land

Plant Diversity

Build Community

Activate Experiences

Sustain Growth
